

Reflection of the month

The body is the basis we will take care of health to be able to do a goo job

Sales Department

How to correctly receive the notice of My Number

As we have seen so far in stating Shin-ei News, the My Number notification letter will be sent to every household in the form of registered mail (check below). This letter cannot just be put in the mailbox, is delivered direct the person needing the signature as well. In the absence in the delivery, the report of absence will be placed in the mailbox (Check the right). The My Number can be sent back to his residence (first case), or look directly into a nearby mail agency of their home or place of work (second case).

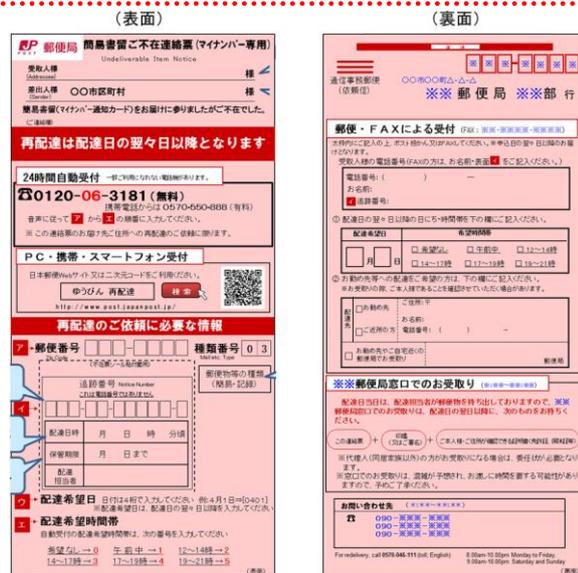

In the first case please call the telephone number indicated. Enter according to the voice guidance. Please enter data delivery with time and date of delivery (the day of delivery should be at least two days after the delivery date). Beyond the phone it can perform the request of the new delivery over the internet, mail and FAX. The second case mark (On the back of the sheet) would like to look at the post office near your home or work. Indicate which agency would like to receive. To receive it is necessary to take the report of the absence left by the mail, stamp and a document proving identity (Zairyu Card, driving license, etc.)

Notifications that could not be delivered due to absence, will be stored for 7 days at the post office that made the delivery. After this period the envelope will be returned to City Hall. The letter of the notification cannot be sent. Even if it has made the request to resend the mail, this will be returned to City Hall.

◆Questions regarding the post, please contact the Central Mail service to customers.

Phone 0120-2328-86 (free call) cell phone call to 0570-046-666 (Paid)

<customer service hours> (mon to fri) 8:00am~10:00pm (Sat, Sun and holidays) 9:00am~10:00pm

Attention! In case of absence in delivery there is also the new delivery option is the neighbor or the company where he works. Such as My Number is very important, we advise that only family members receive the notification. There may also be problems in delivery due to errors in communication. Therefore we advise you receive at home or seek the indicated agency.

Seminar of safety and hygiene at work

On October 27, 2015 was held the Safety and Health Seminar taught by panelist Seki Shinichi of the company Seki Monozukuri Kenkyujo. The teacher reports on the extensive experience in the manufacturing area, which was very interesting. There are several human causes that influence the power of concentration (fatigue, disease, environment at home and at work, human relationships, etc.). Humans tends to get distracted especially when performing repetitive works. So they are carried out dangerous acts, which often end up in accidents. To prevent accidents due to these reasons, the factories there are several instruments, rules and sequences established. We will respect the rules to prevent accidents. Remove the protective cap to increase productivity, do not wear protective material due to the heat is disregarding the rules. Let's not do this.
