

## Reflection of the month

Do not leave for tomorrow what can be done today  
**Administrative Department**

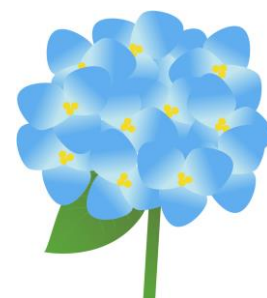

### Shall initiate the My Number system ~ vol.1 ~

The My Number system will start from January 2016. This system has the intention to build the foundation of a just and fair society, optimizing government departments and increasing the convenience to the public. From October 2015 will be sent to everyone (regardless of nationality or age) who have the residence certificate (Juminhyo) a notification card containing your number. Currently the information to identify a person in the various government agencies (numbering of health insurance, social security numbers, numbering unemployment insurance, tax returns, etc.) were different. The items above shall be associated with the same number, simplifying the bureaucratic procedures of various government departments. Future due to IT technology information will be associated, without the need to submit documents in attachments facilitating our lives.

### We will efficiently dry clothes in the rainy season!!

In the rainy season it is difficult to extend the clothes out of the house, having to often dry indoors. Drying clothes indoors in addition to spending a lot of time, oxidation occurs dirt and the reproduction of bacteria causing an unpleasant smell. To avoid this, it is important to dry the clothes in the shortest possible time. By extending the clothes we open space between them. Large pieces like pants and dresses must be extended outside, smaller parts like socks and underwear inside the house. To better wind passage using thick than thin hangers. Leave the air conditioner on dry, using fans may also be effective when drying clothes indoors. We will dry clothes effectively, to be able to work without worries!

### Help those affected in Nepal earthquake
