How to prevent traffic accidents

Even increasing amounts of traffic fines, there will always be traffic accidents. Traffic accidents do not happen intentionally, but most lack of attention. I do not believe there are people who think of intentionally causing accidents. How to avoid accidents? Maybe if everyone had more awareness in traffic and take better care did reduce the number of accidents. In this spring season has many accidents caused by drunken drivers. Let us be aware that there are times that a car, though useful can become a very dangerous object.
